Who Are We?

Berva Furniture; It is a family company that has been producing beds and dining rooms in the furniture industry since 1985. Berva is aware of customer satisfaction responsibilities by way of have the sector experience it has gained since its establishment and being a family company. In this case, it has always been our mission to keep customer satisfaction at the forefront and to offer high quality products with high design value. We have drawn our energies from our vision that is "always, the best" to realize our mission. We will continue to maintain the customer satisfaction we have achieved and add value to your living spaces.

About Our Factory

Our factory located in Hatay Antakya is established on 15.000 square meter area. In our factory, which has a monthly production capacity of 600 sets, we produce with a computer-controlled production line, furniture upholstery line and special design furniture paint booths. Iskenderun Limakport, the closest port to our factory, is 60 km away.

What We Produce!

We design and produce bedroom and dining room sets with has modern lines with the needs of the market. You can reach our sample designs from the link below.

BERVA CATALOG LINK

And also we can do projects for hotels, residences and dormitories.

How We Produce!

We prepare production projects and reports in Top Solid program and send them to computer-controlled machines from the office environment. Through of Topsolid program, we can made recorded all the production's reports. And can be provided fastly and accurate product at any spare part requirement.

Computer Controlled Machine Line

We have panel cnc, panel cutting, edge banding, cnc hole and piece operation cnc machines that are fully computer controlled and work in line with the projects taken from the Top Solid program. We can do fast and accurate mass production with our machines that has millimetric precision.

Paint Booths

Our furniture paint booths have a two-stage filtering system. The air entering in the booths is completely purified from foreign mass thanks to the filters with high retention. As a result of purified the painting booths from foreign mass, smooth surfaces are obtained in the products where paint is applied.

Transportation Process

We hand our package list to the shipping vehicle at every shipment. Thanks to the clarity of the package list, you can easily count and ship packages. You can classify the packages correctly and quickly thanks to the module picture on our labels and the label color identify with each sets.

After Sales Service

For after-sell service, our customer representative and company owner's phones will be online on 7/24 for you. And we have an after-sales production team, apart from the mass production line, to respond to your spare parts needs as soon as possible.
